

TrueClean CP2

Delivering powerful
jets through a slow,
constant rotation

Features

- Low cost, high impact cleaning
- 360° jet coverage to focus in the areas with the heaviest soiling
- Solid ball design creates high-performing, controlled jet spray
- Internal rotor design for a constant, smoother rotation
- Designed to rotate gradually to increase wash liquid dwell time

Applications

- High-impact, targeted cleaning
- Vessels with only a 2.5" tube opening
- Mixing, holding, and fermentation vessels as well as cooking kettles

TrueClean® CP2

TrueClean® CP2

Material	316L
Connection	3/4" NPT
	1" pin
Bearing	Slide bearing
Spray pattern	360°, 180°
Cleaning radius	0.5 – 6.5 ft
Pressure	44 – 174 psi
Flow rate	11 – 29 gpm
