

RB Rotating Spray Ball

The reliability of a static spray ball with the benefit of a rotating system

Features

Double ball bearings allow for steady 360° rotation and a variety of mounting orientations

Thick wall design for higher impact spray

Spray pattern options for complete coverage or targeted cleaning

Media-driven turbine for rotation

Reverts to a static spray ball if rotation fails, decreasing down-time for repairs

Applications

Static spray ball replacement

Heavily soiled tank surfaces

Low pressure, high flow rate

TrueClean® RB

Pin
Connection

Weld
Connection

TrueClean® RB

Material	316L
Connection	Pin, thread, weld
Bearing	Double ball bearing*
Spray pattern	360°, 180° up, 180° down, 270° up
Cleaning radius	2.5 – 8 ft
Pressure	22 – 44 psi
Flow rate	11 – 118 gpm

*Hastelloy® C-22® available upon request
